Job Description – Web Designer / Creative Designer

Position: Web Designer / Creative Designer
Experience: 2–5 Years
Employment: Full-Time

Job Summary

We are looking for a creative and talented **Web Designer / Creative Designer** to join our team. The ideal candidate should have strong knowledge of modern web design, UI/UX, and creative design tools, along with an interest in using **AI tools to improve design creativity and productivity**.

Key Responsibilities

- Design modern, responsive, and user-friendly websites and landing pages.
- Create website UI/UX designs using **Figma**.
- Prepare website graphics, banners, marketing creatives, and visual assets using **Adobe Photoshop**.
- Convert designs into clean, responsive, and well-structured **HTML/CSS**.
- Create creative website layouts and visual concepts.
- Use AI tools such as **ChatGPT, Codex, Antigravity, and other AI-powered design/coding tools** to improve workflow and productivity.
- Generate and edit creative images using **AI image-generation tools**, including GPT image generation and similar platforms.
- Work closely with developers and marketing teams to implement website designs.
- Maintain consistency in branding, typography, spacing, colors, and overall visual quality.
- Research modern web-design trends and suggest new creative ideas.

Required Skills

- Good knowledge of **Figma**.
- Good knowledge of **Adobe Photoshop**.
- Strong understanding of **HTML & CSS**.
- Good understanding of **responsive web design**.
- Good knowledge of **UI/UX principles**.
- Experience using **AI tools such as ChatGPT, Codex, Antigravity, or similar AI coding/design assistants**.
- Knowledge and experience with **AI image-generation tools**.
- Strong creative and visual-design skills.
- Ability to convert business requirements into attractive and user-friendly website designs.
- Good attention to detail.

Preferred Skills

- Experience designing **e-commerce websites** is a plus.

- Knowledge of **Bootstrap** or other CSS frameworks is an advantage.
- Experience creating website banners, social-media creatives, and marketing graphics.
- Basic knowledge of JavaScript is an advantage.
- Strong interest in learning and experimenting with new **AI and creative technologies**.

What We’re Looking For

We are looking for a **creative, innovative, and AI-friendly designer** who can combine strong traditional design skills with modern AI tools to create attractive, responsive, and high-converting web experiences.

Apply Now with your resume and portfolio showcasing your best **web, UI/UX, and creative design work**.
